

**5 ways** to help the environment & save money!

**1 Listen – is the toilet running?** Do you hear what I hear? Notice if there is a noise or moving water. (Low flow toilet saves \$84/year.)

**2 Look – is the faucet dripping?** This is literally throwing money down the drain! (Leaking fixtures cost roughly \$34/year! Low flow showerhead saves \$41/year.)

**3 Turn off the water while brushing your teeth.** Turn off the tap while washing your face, too!

**4 Keep a bottle of drinking water in your refrigerator.** Stop running water just to get it cold.

**5 Run only full loads of laundry and dishes.** Half loads waste water, money and your time! (Water efficient washer saves \$25/year.)

**6 Check the low flow indicator on your water meter.** Learn how to read your meter to stop leaks that could cost you thousands!

**When It Comes To Water  
Conservation  
Works!**
