

# Mattapoisett Water Department

## Winter Weather Tips

- 1) Be sure outside faucets have been shut off including outside showers for those residents who have them.
- 2) Has your cottage been shut off and winterized.
- 3) Check for drafts that may blow cold air in and around water piping which may cause unnecessary freeze ups.
- 4) Residents living in elevated homes with water piping running along foundation columns is the piping adequately insulated and heat tape in place.
- 5) Take a minute to walk down in your basement and locate your water shut off and be sure its easily accessable in case a water emergency happens in your home.

Happy Holidays from all of us at the  
Mattapoisett Water & Sewer Department
